NOTICE.—The subscriber offers for sale, privately, his VALUABLE AMELIA SPRINGS PROPERTY, consisting of about 679 acres of LAND, 156 acres of which are flat land of first rate quality, and all in a high state of improvement. On a good portion of the bigh land there is now a fine crop of Clover—in the production of which no land in Virginia is superior. All things considered, the Amelia Springs is certainly the most valuable property in Eastern Virginia: its situation is healthy, and its waters equal to any in Virginia. The improvements on the place are very large and superior, all of the houses having been erected within the last six or seven years. There is a large brick Hotel, approved of by Doct Parish of the same place. The following is the analysis, compared with that of the White Sulphur Springs:

Law Notice.—The subscriber has removed his office to the basement story of his residence, at the corner of 9th and 1 streets, opposite the Office of the Mutual Assurance Society. He may be found at his office, when not in attendance (again resumed) on some of the Courts of the City.

To CLAIMANTS.—The subscriber, after an interval of some years, again tenders his services to claimants on the Government of the United States, or the State of Vinginal, for revolutionary services, or any other demands, whether arising under contracts or otherwise. His experience in attending to such claims may enable him, in most cases, where they are well founded, to refer to the sources of the information necessary to sustain them. The advantage of that experience—his familiarity with the subject, and a diligent attention, stimulated by the necessity of beginning anew his life of business—he is willing to pledge to those who may employ him—for a moderate certain compensation, or such reasonable contingent commission as may be agreed on. Urged by such strong inducements, he pledges all the industry and energy he may ever have exerted. His residence and office are on 9th and I streets, near the Swan Tavern. Letters addressed to him will be punctually attended to.

SARPEDON AND EMANCIPATION.—Pursuant to a decree of the Circuit Superior Court of Law and Chancery for Brunswick county, pronounced at September term, 1842, I will sell, on MONDAY, the 26th day of June, 1843, to the highest bidder, at Lawrenceville, Brunswick Court house, Va., being Court day, the interest of the estate of the late John Avery, Esq., in the imported Horses Emancipation and Sarpedon—it being one-third part of Emancipation, and one-fourth part of Sarpedon; the other portions belonging to Wm. and Edmund Townes and Wm. G. Spilman.

The blood, performance and high character of the Horses, are too well known to the public to need a comment. Their colts, which have been shown on the turf, have fully sustained the character of their sires, and one of them is now considered one of the very best stock horses in America. The horses are at stands in the West.

Any gentleman wishing to purchase the interest, and desiring further information on the subject, can obtain it by addressing Wm. Townes, near Clarksville, Mecklenburg county, Va.

The terms of sale will be a credit of twelve months; the purchaser giving bonds with satisfactory security to

To Plough Makers and the Proprietors of Foundries.

"THE LIVINGSTON COUNTY PLOUGH."

THE subscriber has purchased the exclusive right of making the above well known Plough in the State of Firginia, and is now prepared to sell patterns to others, with the right of making Ploughs from them. He has the original patterns, which were made during the past year by the Fatentee, under the direction of the subscriber, expressly for the State of Virginia; and they were constructed to avoid all the objections arising to the heautiful Worcester and Boston Ploughs; which latter were made for a soil and a vegetable surface, differing entirely from our own. This New Livingston County Plough will show its superiority over all others when operating in a heavy clover lay or upon land thickly covered with weeds or litter. For more than seventeen years I have been engaged in the Foundry and Plough business in this State; during all which time my attention has been particularly directed to the construction and form of Ploughs both here and at the North, and I can therefore confidently recomend this Plough to my friends and the public generally, as combining all the valuable qualities of cheapness, strength, case of draft, simplicity of construction, a perfect performance of its work, and last and least of all, beauty. There are 4 sizes of the right handed Plough, and a large left handed two horse Plough.

Letters addressed to me, at Mendeville, Halifax county, upon the subject, will be promptly attended to.

BUCKINGHAM LAND FOR SALE.

The indersigned will sell the Tract of LAND, of which the law Archibald Austin, deceased, died possessed, and upon which is widow, Mrs. Grace Austin, now resides, in the county of luckingham, containing about 966 acres. This land is located wort 8 miles from the Court house, 7 miles from the landing at lardwicksville, on the James River and Kanawha Canal, seven a cicht miles from the Slate River Academy. The North fork of Slate river and Austin's creck run entirely through this tract, afording 127 and a half acres of excellent bottom land; eighty-ive acres of which, on North river, are now in fine condition o produce tobacco, wheat and corn. The flat land on Austins creek is sufficiently fertile to produce grain of every kind wthout any aid whatever, and, with judicious cultivation, might be made rich enough to produce tobacco of a very fine quality. All the cleared high land was originally of very superior quality, and is susceptible of a very high degree of improvement, as is very apparent from the fact, that some 40 or 50 acres of the adest and most worn parts of the tract have, within the last fev years, been converted, by the use of clover and plaster alone, no rich and productive tobacco lots. Between three and four hindred acres of which is first rate tobacco land. There is on the tret a great abundance of excellent plant land. The improvements are an excellent two story dwelling house, entirely new, arge and commodious, having two rooms and a passage above and below stairs, and a wing; a new stable, granary, thresting machine, two framed tobacco barns, all built of the very best materials, and all our houses necessary for so large an establishment, in excellent repair. This land is well watered, and situated in a healthy, agreeable, intelligent and moral neighborhood. A mere particular description is unnecessary, as it is presumed all persons wishing to purchase will view the land and judge for the macerials, and all times commands the highest prices; much the largest portion

CONTINUATION OF FOREIGN NEWS. TURKEY AND EGYPT.—Letters from Alexandria speak of fresh disorders in Syria, arising from the excesses of the Albanian and Turkish troops. The Albanian troops are stated to have been driven out from Tripoli, by the inhabitants, and to have retired to Beyrout where they renewed their excesses of theft, violation, and massicre. A letter from Constantinople states, 1,400 that the Emperor of Russia has declared, that no per son shall be excluded from the list of candidates for the 1,250 sovereignty of Servic, and that Sir Stratford Canning 1,000 has received instructions to support the pretensions of the present Prince in a new election. According to the same letter, the Austrian Cabinet is doing all in \$130 00 its power to obtain the election of Prince Milosch .-The source of the information published by the Con-

stitutionnel, is not, however, entitled to much credit SPAIN .- Spain continues to be in a very unsettled condition. It is said that refugees of all opinions in France are flocking to the towns near the frontier; and among those who have approached Bayonne, is Jauregny, el Pastor.

There has been a disturbance at Malaga, in conse quence of the dismissal of Lopez and his cabinet. The French steamer Gassendi called there on the 25th of May, and found that the place had been for some days in a state of insurrection. The intelligence from Malaga, Grenada, and Alme da, states that the juntas installed in these towns con-

65 00 da, states that the juntar instance which extended to Estepona, a small town situate between Malaga and Gib An insurrectionary attempt was tried at Cadiz, on the 1st inst, but without success. By accounts from Saragossa, of the 6th inst., we learn that a number of persons of influence in this city were preparing to emigrate to France for fear of an outbreak, which was considered inevitable.

"The National Guard," says the Toulannais, "was in possession of all the ports, and had compelled the military authorities to join the movement. The latter, however, had succeeded in effecting their escape, bringing with them all the troops, on the night of the 25th. A great number of men armed with muskets, and provided with leather belts full of cartridges, (smugglers, no doubt,) were coming in from the neighboring villages. Carts and horses, carrying muskets, had entered the city, whilst other arms and ammunition were landed from boats. On the 26th, when the Gassendi left Malaga, the Square of the Constitution was armed with National Guards, who londly demanded the recall of the Lopez Cabinet, and declared that on no other conditions would they recognize the authority of Espar-

(From the London Times, June 15.)

The alleged occupation of the Sandwich Islands by he British squadron under Admiral Poulett is an oc currence which has given rise to more excitement on the continent than in this country, but as we have now a correct statement of the facts before us, we are enabled to set at rest the conjectures and apprehensions which this incident has occasioned. It appears that vernment of the Sandwich Islands on behalf of British not quite appropriately called Euphonia, of Mr. Faber, subjects, and by the British admiral, the Sovereign of the result of a beautiful adaptation of mechanics to the certain claims having been preferred against the Go hose islands professed his inability to meet the demands in question, but offered to divest himself of the sovereignty of his dominions in favor of the Queen of articulate sounds, or even to imitate the human voice,

ine accepted the cession of these territories conditionally, but he acknowleged at the same time that he was acting without instructions, and the arrangement was o be regarded as provisional until it should be ratified and approved by her Majesty's Government. The view which has been taken of this Treaty of

cession in this country, is not favorable to its confirma-tion. Although no blame can be laid on Admiral Poulett for his share in the transaction, we understand that the Sandwich Islands are not to be annexed to the dominions of the British Crown, but to be 500 restored to the independent authority of the native sovereign. Although these islands are unquestionably superio to all the other groups of the Polynesian Archipelago. in size and in position, both as regards the whale fisheries and refreshment of vessels crossing the Northern

would confer upon this country any advantage not equally to be attained by the maintenance of their independence. That independence having been recognized by the United States, and having been pointedly adverted to by the representatives of this country upon a recent occasion, it was obviously our duty as well as our interest to respect it.

This very transaction will have placed the independence of the Sandwich Islands on the strongest possible foundation-for, we may presume that no State will venture to appropriate what England has

made over to her with the consent of the reigning powers in the island. COMMERCIAL TREATY -The London Herald, at the lose of an article on the subject of a Commercial Treaty between Great Britain and this country, makes

the following statement:
"Mr. Duff Green-the gentleman to whom we have already referred, who was formerly connected with a Washington journal, and who enjoys, we are told, the President's confidence—being lately about to proceed to Europe, was put by Mr. Tyler into complete possession of his views, and strongly recommended by the President to the American resident at this Court. Mr. Everett was, indeed, directed by Mr. Tyler to present Mr. Green to Sir Robert Peel, in reference to this subject. Mr. Green had not, however, any offi-cial character or powers, and his mission was simply to impress on our Government President Tyler's opinion, and to express his willingness to open negotia-tions at Washington. Mr. Green has, we hear, been placed in communication with Sir Robert Peel-but it has, we are informed, been intimated to him, that as he is not possessed of any diplomatic powers or character, no expression of opinion or reply to his state-ments can be given by the responsible servants of the British Crown. Those statements have been heard with attention and courtesy, and there the matter

reek, Sir R. Peel appeared at the bar, and announced that he had a message from her majesty. It was brought to all the doctrinal statements of our Church, on this up and read from the chair, the members sitting unco-

ness, the Hereditary Grand Duke of Mecklenburg Strelitz. After the many proofs of affection from her Majesty's family given by the House of Commons, and to which her Majesty is fully alive, she has no doubt of the readiness of the House of Commons, to make a of contrariety or discordance from the formularies of of the readiness of the House of Commons, to make a suitable provision for her Royal Highness on this occasion." [The reading of this message was followed by loud laughter from (for that early hour of the evening) a very full House. It is right here to observe, that servant, I be a suitable, as well as unlaughter from (for that early hour of the evening) a very full House. It is right here to observe, that a very full House. It is right here to observe, that servant, the laughter had no reference whatever to the royal message, or the illustrious parties to whom the message alluded. The fact may be explained in a few words: From the sitting of the House there was a rumor very generally believed that Sir R. Peel was to bring down message from her Majesty connected with the present state of affairs in Ireland. The right honorable baronet entered the House a few minutes before five o'clock, and took his usual seat; but after the lapse of a short time, he rose and went to the bar, from which, having been called on by the speaker, he announced, "A message from her Majesty." The stillness of the house at this announcement was almost deathlike, nor was it much interrupted by the soft tread of the right hon. baronet as he walked to the table and delivered the 'message" in. It was then read by the speaker, and as he went to the end the subject was so very different from what was expected, that a loud laugh burst from nearly all who were not in the secret. It was evi dently a laugh of much satisfaction, we should rather say of downright joy, to judge by the faces of most of the members who joined in it]

[London Correspondence of the New York Herald.] LONDON, June 16, 1843. There is little news to offer since the departure of

the last steamer. The weather here has been quite wet and cold, and small apprehensions began to be entertained for the coming crop-but yesterday and to-day the funds rose under its beneficial influence. The cotton market is quiet, and the sales at Liverpool have been quite moderate for the last few days. Prices are without change. The business in the manufacturing districts is still fair, and the late news from America has revived the hope of again receiving larger orders from our side of the water. The races at Ascot, yes terday, were not as largely attended as is often the case, in consequence of the absence of the Queen; but, not withstanding, the show of equipages, and the presence of a large number of the nobility and gentry, gave life and animation to the scene. This day was very fine, (the first fine day in weeks,) and the course

in good order.
The sweepstakes was won by Col. Peel's Murat, with ease, beating Elysium and Highlander. Her on Tuesday .- New York Plebeian,

NO. 17 .-- VOLUME XL.

Majesty's plate of 100 guineas was taken by Lord Lowther's colt, three years old, out of Silvertail, and the Mickleham Hall stakes by Lord Chesterfield's New Brighton. Several other races came off, the details of which will be found in the papers. At a meeting on Wednesday, of the proprietors of the Bank of British North America, the state of the colonies, in their business relations, was stated to be greatly depressed .-Large failures were reported in Montreal, Quebec, and New Brunswick, and the proprietors were compelled to pass their usual dividend by reason of the losses sustained in the latter cities.

The Anti Corn Law League are laboring with great zeal and effect, and I am much mistaken if Sir Robert Peel will not, before long find it indispensable to the maintenance of his power to defer the growing feeling against monopoly in corn. The speech of Mr. Webster is well received here in most circles, and the predictions of your friend, Gen. Green, that the great interests of the British people would induce a modifi-cation of the high tariff on British agricultural products, by agreeing to the adoption of a Commercial Treaty with America, appear to be destined to be re-alized, if the signs of the times do not deceive me.-I see the stock market is quite buoyant in Wall street. Keep the brokers within bounds, and let the speculative mania be duly controlled, and the rise of prices will be beneficial to the feeling on this side of the water, as our British brethren will feel much more disposed to look on us with favor, if we are able to take care of ourselves. There has been a large failure at Bristol in the iron trade, and more are inticipated in that depressed branch of business. Messrs. Oakley and Ryan, the Itlinois Commissioners, have arrived in good health. They are active and shrewd men, and will do all that can be done to accomplish the object of their mission.

Yours, truly, THE WORLD'S ANTI-SLAVERY CONVENTION .- This Convention commenced its session in London on Tues-day, June 13. In the absence of the venerable Clarkson, S. Guraey, Esq, was called to the chair. Rev. Joshua Levitt, of the United States, (Editor of the Emancipator,) was one of the Vice Presidents. The delegations from the U. States represented Anti-Slavery Associations in the States of Maine, Massachusetts, Connecticut, New York, Illinois, Indiana, Ohio, &c. The delegates from France had not arrived at the opening of the Convention. Those from Holland were present.

THE RIGHT OF SEARCH .- We have much pleasure (says the Standard) in being enabled to announce, that the American Government are represented as showing every disposition for an early adjustment of the right of search and visitation question. Letters were received from various authorities in the States, giving this gratifying information, and there is little doubt but that a speedy settlement will be brought about. THE SPEAKING MACHINE .- I have as at yet seen

no notice in your valuable periodical of an invention which is at present attracting much attention here, and which certainly merits every praise that can be bestow ed upon unwearied perseverance and successful inge nuity. It is the Sprachmaschine, or speaking machine, laws of accoustics. You are aware, that the attempts of Cagniard la Tour, Biot, Muller, Steinle, to produce have not been very successful; in fact, our knowledge The British admiral, emulous, perhaps, of the recent of the physiology of the largny and its appendices has policy of France in the groups of islands South of the been so limited, that we have not even an explanation of the mode in which the falsetto is produced. Mr. Faber's instrument solves the difficulties. I can only give you a very imperfect idea of the instrument. To understand the mechanism perfectly, it would be necessary to take it to pieces, and the dissection naturally is not shown the visitor: less from a wish to conceal any thing, than from the time and labor necessary for such a purpose. The machine consists of a pair of bellows, at present only worked by a pedal, similar to that of an organ, of a caputchouc imitation of the larynx, tongue, nostrils, and a set of keys by which the springs are brought into action. [The further description would be unintelligible without diagrams] The rapidity of utterance de-pends, of course, upon the radidity with which the the instrument speak sounded rather ludicrous, Mr. Faber was most successful. There is no doubt that the machine may be much improved, and more especially that the timbre of the voice may be agreeably modified. The weather naturally affected the tension of the India rubber; and, although Mr. Faber can raise the voice or depress it, and can lay stress upon a particular syllable or word, still one cannot avoid feeling, that there is room for improvement. This is even more evident when the instrument is made to sing; but, when we remem-ber what difficulty many people have to regulate their own chorde vocals, it is not surprising that Mr. Faber has not yet succeeded giving us an instrumental Cata-lani or Lablache. Faber is a native of Frieburgh, in the Grand Duchy of Baden; he was formerly attached conceived herself bound to restore, after it had been to the Observatory at Vienna, but owing to an affec-tion of the eyes, was obliged to retire upon a small pen-sion; he then devoted himself to the study of anatomy, and now offers the results of his investigations and their application to mechanics to the world of science.

[Athenœum. Oxford, FRIDAY EVENING .- The sentence against Dr. Pusy, the Regius Professor of Hebrew, for having preached an objectionable sermon on the 14th of May last, is understood to be a prohibition from preaching within the precincts of the University for the space of

In consequence of the above decision, the following protest has been promulgated by the Rev. Mr. Pusey: "Chust Church, June 2, 1843. "Mr. Vice Chancellor - You will be assured that the following protest, which I feel it my duty to the Church to deliver, is written with entire respect for your

office and without any imputation upon yourself indi vidually. "I have stated to you, on different occasions, as opportunity offered, that I was at a loss to conceive what in my sermon could be construed into discordance with the formularies of our Church; I have requested you to adopt that alternative in the statutes which allows the accused a hearing; I have again and again requested that definite propositions which were thought to be at variance with our formularies should, according to the alternative in the statute, be proposed to me; I have declared repeatedly my entire assent, ex animo, subject, and have, as far as I had opportunity, declared ered:

VICTORIA REGISA—Her Majesty thinks it right to have ground to think, that as no propositions out of my acquaint the House of Commons that she has given her sermon have been exhibited to me as at variance with acquaint the House of Commons that she has given her sermon have been exhibited to me as at variance with consent to the marriage of her Royal Highness the doctrine of our Church, so neither can they; but that I have been condemned, either on a mistaken con-Highness the Duke of Cambridge, to his Royal High-struction of my words, founded upon the doctrinal opinionsof my Judges, or on grounds distinct from the

The following appears to us, as the matter stands, to be of the most reasonable project for a Democratic National Convention, viz:

To be held in May, 1844. Delegates to be elected as the democracy of each state shall decide.

To vote by such rule as may be agreed on by the onvention itself. What say you brother Democrats? [Kendall's Expositor.

We fully concur in opinion with these views of the Expositor, and freely respond to them, with the Boston Post-Amen. As to the time of holding the Convention, we think it is already conclusively settled, by the voice of a ma-jority of the States, in favor of May, 1844. We see no

reasonable objection, therefore, to this arrangement.

SLOOPS OF WAR .- The Navy Department issued orders a short time ago for the construction of six slorps of war. It appears that the construction of there vessels has been entrusted entirely to the six U.S. Naval Constructors, who are required to build a sloop of war each, after his own model. The one which proves the most superior of the six, it is understood, will be taken hereafter as the model ship of the class. The inferior class of sloops of war, such as the Yorktown, Preble, Decatur, Dale and Marion, built a few years since under the direction of the Board of Navy Commissioners, are asserted to be very unfit for the service for which they were built. Independant of their unfitness for cruising, by reason of their dulness as sailers, they are uncumfortable vessels in every respect, and mount only sixteen guns. The vessels about to

be built are to be one thousand tons burthen; they are to rate twenty guns, but will carry from twenty-four to twenty six heavy guns.

The keels of two of these vessels have been laid, one at Boston, and the other at Philadelphia. The keel of mother is to be laid at the Navy Yard at Washington. of another is to be laid at the Navy Yard at Washington
